

# DRAGONIUM

## ASSOCIATION ZYZOMIS

**The magus is a Gemmologist. He can also be a Lapidary or a Jeweller.**

The Gemmologist collects raw gemstones and scales of crystalline dragons.

The Lapidary makes cut stones from the rough stones and scales. To carry out his work, he needs a catalyst: a stylus (the quality depends on the level of the stone to be made).

The Jeweller sets the cut stones to make holes for materias on equipment that does not have them and that can have them. To carry out his work, he needs a catalyst: a pair of tweezers (the quality depends on the level of equipment to be worked on).
