

DRAGONIUM

ASSOCIATION ZYZOMIS

The warrior is a Miner. He can also be a Smelter or a Blacksmith.

The Miner collects ores.

The Smelter uses the ores to make metal ingots and certain alloys. To do this job, he needs a catalyst: a melting pot (the quality depends on the metal to be melted).

The Blacksmith uses the ingots to add a 10% bonus to equipment. He can also make metal objects. To do this job, he needs a catalyst: a hammer (the quality depends on the level of the equipment).
